It is hard to believe that March is already here. It won't be long before the warm weather arrives. As you may know, this is a time of year that students make the most academic and social learning improvements. The weather is changing and is here. It can be challenging to keep our children focused on learning. What can you do to make school a top priority for your child? Keep these ideas in mind:

- Make attendance your number one priority. Let your child know that unless they are sick, they must attend school (and be on time). Make an effort to schedule appointments after school hours.
- Remember, grades belong to students, not parents. They are a means by which we can teach personal responsibility, natural consequences, and the value of hard work, good study skills and affirmative social skills.

As always, THANK YOU for being our partners in this important work helping your child enjoy learning and prepare for a bright future!

Kimmerie Allen
Principal
