SECTION I: OVERVIEW

The South Carolina Department of Education gathers information about kindergarten students at the beginning of the school year. The assessment system is aligned to state and federal guidelines and standards for young children, birth through age 6. The Kindergarten Readiness Assessment (KRA) is designed for use during the first 45 days of a student's kindergarten school year. This document addresses the scope of the administration of the KRA.

The guidelines were developed using feedback from teachers, as well as input from state and national experts. The supports and strategies outlined in this document are intended to maximize the participation of all students in the KRA.

Participation Requirements

All students, including students with disabilities and students who are multilingual learners, are required to participate in the KRA and have their results be part of the state's summary reports.

For the Kindergarten Readiness Assessment:

- A student with a disability is defined as a student with an Individualized Education Program (IEP) or a Section 504 plan.
- A student who is a multilingual learner is defined as a student whose primary or home language is one other than English and who cannot perform some or all classroom activities in English because he or she may have limited or no age appropriate ability to understand or speak in English.

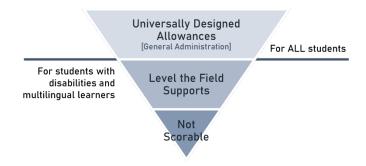

A fully accessible approach to assessment design and implementation is necessary for students with diverse learning characteristics to ensure that they have the opportunity to demonstrate their knowledge and skills. At the same time, states need to be confident in the results obtained from the assessments when conducting analyses and making policy decisions. In addition, school administrators, teachers, and parents need to have a true sense of where their students are developmentally, and subsequently identify focus areas in which they can plan instruction that promotes growth in individual students.

To meet all of these needs, a structured decisionmaking process has been developed for identifying and implementing individualized student supports when administering the KRA.

Differentiating Assessment Administration

Expectations have been established for students participating in the KRA with consideration for their unique developmental needs and levels of school readiness. A tiered decision-making process has been developed for differentiating administration of the assessment (see Figure 1).

Figure 1: Differentiating Administration of the Kindergarten Readiness Assessment

This process begins with utilizing universally designed allowances (UDAs), which are supports that are appropriate to provide to all students. When further individualization is needed for students with disabilities and students who are multilingual learners, the process outlines additional allowable supports and administration procedures.

This decision-making process for differentiating administration of the KRA uses the following options:

- General Administration This is the administration of the KRA following General Administration procedures (applicable to the particular assessment) with the application of applying universally designed allowances.
- Level the Field Supports (for students with disabilities and students who are multilingual learners only) – This involves administering the KRA following general administration procedures, but providing additional allowable individualized supports above and beyond universally designed allowances.
- Not Scorable (for students with disabilities and students who are multilingual learners only) – Some assessment activities may not be within a student's abilities given any allowable support. In other words, the skill being assessed may not be appropriate given the student's disability or level of English language proficiency. Therefore, the skill is considered "Not Scorable."

When administering the KRA, teachers do not need to move sequentially through these three options for students with disabilities and multilingual learners. For example, they can start administration with using the Level the Field option. Teams should, however, avoid assuming that a student with a disability or a student who is a multilingual learner needs to automatically move beyond General Administration (Universally allowed procedures).

General Administration with Universally Designed Allowances

Universal design describes a framework for curriculum design, instructional processes, and assessments that provides all students with equal opportunities to learn and to demonstrate what they have learned (CAST, 2013; PARCC, 2014; Ray, Aguinaga, & Bigler, 2010).

In general, the impetus behind universal design is to provide access to the greatest number of students during instruction and assessment. This, in turn, minimizes the need for accommodations or changes. Universal design benefits all learners, as it incorporates flexibility to meet the diverse needs of a wide range of students. It is particularly advantageous when variability—both within a student's developmental profile and in comparison to others—is common.

Applied to the Ready for Kindergarten assessments, universally designed allowances encompass the range of actions, material presentations, procedures, and settings that are acceptable for use with all students.

Level the Field Supports

Level the Field supports are individualized supports only for students with disabilities and students who are multilingual learners. They are provided in addition to universally designed allowances, when needed.

Level the Field supports are designed to provide equal access and opportunity for participation in the KRA without substantially altering what a student is expected to do. These supports are intended to reduce or even eliminate the effects of a student's disability or limited English proficiency (Bagnato, Neisworth, & Pretti-Frontczak, 2010).

To be effective, these supports must address the unique needs of the student for whom they are provided and should assist the student in overcoming the educational barriers that prevent him or her from demonstrating his or her true knowledge and skills. Providing a student with Level the Field supports yields scores on the KRA that are as valid and reliable as they would be if General Administration procedures were used.

Using the "Not Scorable" Option

For students with disabilities and students who are multilingual learners, the Not Scorable option should only be considered after universal designed allowances (UDAs) and Level the Fields supports have been used. The rating of Not Scorable should only be applied after consultation with the special education or ESOL teacher and it has been determined that the student is not able to access the KRA item due to his or her disability or the student's level of English proficiency. A child's overall and domain scores are impacted when a Not Scorable rating is used.

A Not Scorable rating would be appropriate, for example, when a student with a disability is being assessed on a KRA item requiring demonstration of a skill such as hopping, and the student is not able to respond due to a physical disability that restricts or prevents gross motor movements related to the skill being assessed. A Not Scorable rating would not be appropriate when the response to an item reflects the child's functioning at an earlier development level and their ability to respond is not otherwise affected by their disability; in this instance the appropriate rating is a "O" since the child was able to access the item, but did not demonstrate the skill according to the criteria.

A multilingual learner, for example, would have a Not Scorable rating when the student is not able to respond to a KRA item based upon the language demands of the teacher directions (i.e., not understanding the directions). However, if the student understands the directions of the skill being assessed (e.g., counting) but is unable to respond in English, then the rating would be a '0.'

Team-Based Decision-Making

Teachers administering the KRA to students with disabilities and students who are multilingual learners should collaborate with the student's instructional team (e.g., special educator, English for speakers of other languages [ESOL] staff, parents) to identify needed supports. School/program staff members on the instructional team should familiarize themselves with assessment materials ahead of time so they are able to discuss the allowable supports that should be used during administration.

Below are questions team members may want to consider when reviewing the assessment.

- Is the assessment task similar to other classroom tasks and activities in which the student has experience participating, or will the student have the opportunity to practice similar tasks prior to administering the item?
- Do we provide individualized supports, such as those indicated in the student's Individualized Education Program (IEP), Individualized Language Acquisition Plan (ILAP), or Section 504 plan, for a classroom task that is similar to the item?
- Are there barriers to participation in the assessment activities that could be removed by implementing a support that is not already in place for the student in the classroom?

The supplementary aids, services, and other supports provided for students with disabilities and students who are multilingual learners in the classroom and other education-related settings on a regular basis should be used, as appropriate, when administering the KRA.

When determining which supports to implement with students with disabilities and students who are multilingual learners during assessment administration, the student's instructional team members should thoroughly familiarize themselves with the student's individual learning characteristics.

In selecting appropriate individualized supports to provide, it is important that the instructional team, including parents, be aware of the following considerations:

- Supports should not be assigned broadly across a particular disability category or level of English proficiency.
- Supports should be used to provide access, but not an advantage.
- Teachers and other service providers need opportunities to learn which supports are helpful during day-to-day classroom activities, including other assessment activities, prior to administering the KRA.

SECTION II: DIFFERENTIATING ADMINISTRATION OF THE KINDERGARTEN READINESS ASSESSMENT

This section provides information for teachers about the allowable ways to differentiate administration of the Kindergarten Readiness Assessment. First, it describes the universally designed allowances (UDAs) that are to be used, when needed, with all students. Then, it describes the decision-making processes to follow when the UDAs are not sufficient to enable students with disabilities and students who are multilingual learners to participate in the assessment.

Universally Designed Allowances

Table 1 indicates the universally designed allowances to be used, when needed, with all students participating in the KRA. These allowances are aligned to best practices for access to instruction and assessment. They are distinguished by the following categories: Directions, Item Presentation, Student Response, Setting, and Scheduling.

Table 1: Kindergarten Readiness Assessment—Universally Designed Allowances for All Students

Directions	 Read directions aloud and repeat as many times as needed, either by request of the student or as determined by the teacher. Important: When repeating directions, teachers should not deviate from the item's script. Pause while reading directions to ensure the student is attending. Redirect the student's attention to an item or a direction.
Item Presentation	 Provide magnification or enlargement of the test items (as many as needed). Change the position or orientation of materials to maximize the student's visual engagement (e.g., hold the stimulus booklet at a vertical angle instead of placing it flat on a table). Provide audio amplification for verbal directions. Provide physical support that maintains all possible answer choices for a given item to improve visual acuity. For example, use color contrast overlay. Allow the student to retake an item, as determined by the teacher, at any point within the test window if the teacher determines that the student's performance was not indicative of his or her typical level of functioning (e.g., due to illness).
Student Response	 Allow the student to point to or verbally indicate a response for an item that asks the student to touch the correct response. Allow the student to indicate a corrected or changed response. Encourage a response from the student as long as the encouragement is not used as a cue.
Setting	 Assess the student in a familiar, comfortable location in the classroom or school. Allow the student to move and change locations during a test session. Change the lighting. Change the arrangement of the furniture, including allowing the student to stand during a direct assessment activity. Provide noise buffers. Assess in a setting with minimal visual distractions.
Scheduling	 Use teacher discretion for starting and stopping item and/or section administration. Allow the student to initiate starting and stopping item and/or section administration. Give as much time as needed to complete an item, unless otherwise indicated in the item directions. Provide breaks as needed.

NOT Allowable Supports

The following supports are NOT considered universally designed allowances and should NOT be used when administering the KRA.

- DO NOT simplify language/words of the script;
- DO NOT rephrase, paraphrase, or change the semantics of the script;
- DO NOT use more familiar terms or words than those provided in the script;
- DO NOT provide visual or auditory cues not indicated in the script (e.g., claps, holding up fingers);
- DO NOT substitute or omit words from the script (e.g., skip over words or phrases);

- DO NOT provide clues and cues;
- DO NOT ask guiding questions not contained in the script;
- DO NOT cover or hide some of the item images to eliminate answer choices;
- DO NOT change test materials in any way; and,
- DO NOT provide information or prompts about an item beyond what is provided in the item's script.

Additional Supports for Students with Disabilities

Even with the use of universally designed allowances, teachers may find it necessary to provide additional individualized supports to students with disabilities when administering the kindergarten readiness assessment.

The kindergarten teacher in consultation with the special education teacher should use the decision-

making process presented in Figure 2 to identify the allowable supports that may be used for a student with a disability to promote access to and participation in the assessment. The supports differ depending on whether an item is a selected response/ performance task or observational rubric item.

Figure 2: Decision-Making Process for Administering the Kindergarten Readiness Assessment to Students with Disabilities

OPTION 1: GENERAL ADMINISTRATION FOR STUDENTS WITH DISABILITIES INSTRUCTIONS FOR ASSESSMENT WAS THE STUDENT ABLE TO RECORDING PERFORMANCE DATA **ADMINISTRATION** PARTICIPATE USING THE OPTION? Administer the item following general Record the student's score in administration procedures and Ready for Kindergarten Online. utilizing KRA universally designed allowances (see Table 1). Continue to the next item. See Recording Performance Data Note: Repeated use of a particular universally designed allowance across multiple items could indicate an instructionally-relevant pattern of support needs. Record this information on the Student Details page in Ready for Kindergarten Online by clicking the comment button within the Individualized Supports box to note any Go to Option 2: Level the Field allowances that were repeatedly used. **Supports**

OPTION 2: LEVEL THE FIELD SUPPORTS FOR STUDENTS WITH DISABILITIES			
INSTRUCTIONS FOR ASSESSMENT ADMINISTRATION	WAS THE STUDENT ABLE TO PARTICIPATE USING THE OPTION?	RECORDING PERFORMANCE DATA	
Administer the item following general administration procedures, but also provide one or more of the allowable Level the Field Supports listed below (beyond universally designed allowances). SELECTED RESPONSE/ PERFORMANCE TASK ITEM Use braille to present item content, when appropriate. Use sign language to administer the item to a student who is deaf or hard of hearing and uses sign language as his or her mode of communication. Allow the student to gesture toward, touch, use eye gaze, or otherwise indicate a response through whatever dominant communication mode/language he or she utilizes, including sign language, sign language approximations, and digital language (e.g., use of augmentative communication device, allowing the student to "show" versus "tell").	See Recording Performance Data NO Go to Option 3: Not Scorable	 On the Individual Student Details page in Ready for Kindergarten Online, click the View Supports button within the Level the Field Supports box and select the support(s) used under Student with a Disability. Note: The same Level the Field support may be used for multiple items, but it only needs to be recorded once within the Level the Field Supports box. Record the student's score for the item. Continue to the next item. 	
 OBSERVATIONAL RUBRIC ITEM Do not penalize the student for the use of varied materials that allow the student to demonstrate the skill independently as stated in the item (e.g., adapted writing utensils). The student can use any of the following modes of communication to demonstrate skills and behaviors that imply verbal or spoken language, such as items that use the words express, suggest, communicate, ask, or tell: Sign language (including approximations). Digital language (e.g., use of an augmentative communication device). Gestural language (e.g., head nod, eye gaze). 			

OPTION 3: NOT SCORABLE FOR STUDENTS WITH DISABILITIES

RECORDING PERFORMANCE DATA

- 1. After consultation with the special education teacher, record **Not Scorable** for the item in Ready for Kindergarten Online.
- 2. Use the item's comment box to explain why the item was Not Scorable. Also, look for the skill in naturally occurring routines and activities and record information/observations useful for instructional decision-making.
- 3. Continue to the next item.

Additional Supports for Students who are Multilingual Learners

As students who are multilingual learners become more proficient in English, their need for supports beyond universally designed allowances will decrease.

English for speakers of other languages (ESOL) staff and teachers should use the state determinations and the information provided below to identify which students who are multilingual learners are considered eligible to receive additional supports beyond universally designed allowances for the Kindergarten Readiness Assessment.

- Proficiency (Eligible for Additional Supports
 Beyond Universally Designed Allowances) –
 Students at the beginning level of English
 language proficiency tend to have the greatest
 need for supports. These students may be able
 to respond with gestures, words, or phrases to
 songs, chants, or stories modeled by teachers
 but are able, at most, to answer questions in
 their native language or with only one or two
 words or short phrases in English.
- Students with Intermediate English Language
 Proficiency (Eligible for Additional Supports
 Beyond Universally Designed Allowances) –
 Students at the intermediate level typically have
 developed some proficiency in English (e.g., they
 are able to act out songs and stories using
 gestures and possibly retell short narrative

- stories through pictures, and they can repeat sentences from rhymes and patterned stories). If they have learned the activity in English, they may be able to access the assessment item if it is delivered in English.
- Students with Advanced English Language
 Proficiency (Not Eligible for Additional Supports
 Beyond Universally Designed Allowances) –
 Students at the advanced English language
 proficiency level are expected to have a
 decreased need for support. For example, these
 students are able to order pictures of events
 according to sequential language, arrange
 objects or pictures according to descriptive oral
 discourse, and tell original stories with emerging
 detail.

Please note that the results of the KRA do not identify the multilingual learner's level of development. In order to do so, an assessment would need to be made using the student's home language. The KWAPT or WIDA Screener for Kindergarten created by the WIDA© Consortium are used by South Carolina ESOL teachers to assess a student's initial English proficiency level.

Teachers should use the process presented in Figure 3 to identify the allowable supports that may be used for an eligible student who is a multilingual learner to promote access to and participation in the assessment.

Figure 3: Decision-Making Process for Administering the Kindergarten Readiness Assessment to Students who are Multilingual Learners

OPTION 1: GENERAL ADMINISTRATION FOR MULTILINGUAL LEARNERS				
INSTRUCTIONS FOR ASSESSMENT ADMINISTRATION	WAS THE STUDENT ABLE TO PARTICIPATE USING THE OPTION?	RECORDING PERFORMANCE DATA		
Administer the item following general administration procedures and utilizing KRA universally designed allowances (see Table 1).	YES	 Record the student's score in Ready for Kindergarten Online. Continue to the next item. 		
	See Recording Performance Data NO Go to Option 2: Level the Field Supports	Note: Repeated use of a particular universally designed allowance across multiple items could indicate an instructionally-relevant pattern of support needs. Record this information on the Student Details page in Ready for Kindergarten Online by clicking the comment button within the Individualized Supports box to note any allowances that were repeatedly used.		

OPTION 2: LEVEL THE FIELD SUPPORTS FOR MULTILINGUAL LEARNERS				
INSTRUCTIONS FOR ASSESSMENT ADMINISTRATION	WAS THE STUDENT ABLE TO PARTICIPATE USING THE OPTION?	RECORDING PERFORMANCE DATA		
Administer the item following general administration procedures, but also provide one or more of the allowable Level the Field Supports listed below (beyond universally designed allowances). Consider multiple modes for demonstrating skills and behaviors if the item implies verbal or spoken language, such as observational rubric items that use the words express, suggest, communicate, ask, or tell. Accept multiple means of expression by allowing the student to point to, gesture toward, or touch a response instead of or in addition to providing a verbalized	See Recording Performance Data NO Go to Option 3: Not Scorable	 On the Individual Student Details page in Ready for Kindergarten Online, click the Manage Supports button within the Level the Field Supports box and select the support(s) used under English Learner. Note: The same Level the Field support may be used for multiple items, but it only needs to be recorded once within the Level the Field Supports box. Record the student's score for the item. Continue to the next item. 		

OPTION 3: NOT SCORABLE FOR MULTILINGUAL LEARNERS

RECORDING PERFORMANCE DATA

- 1. After consultation with the ESOL teacher, record *Not Scorable* for the item in Ready for Kindergarten Online.
- 2. Use the item's comment box to explain why the item was *Not Scorable*. Also, look for the skill in naturally-occurring routines and activities and record information/observations useful for instructional decision-making.
- 3. Continue to the next item.

Determining When to Pause Administration of a Domain

When three items (not necessarily consecutive) are marked as "Not Scorable," the teacher is advised to pause administration pending a review of the remaining items in the domain by the student's instructional team.

Note the difference between "Not Scorable" and a score of "0" on an item. "Not Scorable" means the teacher was not able to score the item because the child could not access it given allowable supports. A score of "0" means the child was able to access the item but did not demonstrate the skill according to the scoring criteria.

If it is determined that the student should not continue to be assessed *in that domain*, the remaining unanswered items should be marked as "Not Scorable" (DO NOT leave as "Needs to be Administered") in that domain.

KRA Administration Protocol for Students who are Deaf or Hard of Hearing

The KRA has features in printed English and in cases where young deaf/hard of hearing children are not yet reading, American Sign Language (ASL) accommodation by a human signer for the KRA is provided. Human signers who provide ASL accommodations must follow these procedures during KRA testing to ensure the standardization of the ASL presentation of the assessments.

Procedures for ASL Human Signers Providing the Human Signer Accommodation for the KRA:

- Human ASL signers must be trained in the KRA administration, pass the content assessment, simulator, and then sign the Test Security Agreement provided by the LEA.
- 2. Human ASL signers should use conceptually accurate signs, with or without simultaneous voicing, signing only what is printed in the test book or on the computer screen without changing, emphasizing, or adding words.
- 3. Human ASL signers may not clarify (except for test directions), provide additional information, assist, or influence the student's selection of a response in any way.
- 4. Human ASL signers must use the same signs if the student requests a portion repeated.
- Human ASL signers should be provided a copy of the test and the examiner's directions two school days prior to the start of testing, in order to become familiar with the words, terms, symbols, signs, and/or graphics that will be read aloud to the student.
- 6. Human ASL signers may repeat passages, test items, and response options, as requested, according to the needs of the student. Signers should not rush through the test and should ask the student if they are ready to move to the next item.

- 7. Human ASL signers may not attempt to solve or answer any of the KRA problems, or determine the correct answer to a test item while signing.
- 8. Human ASL signers must use facial expressions consistent with sign language delivery and must not use expressions which may be interpreted by the student as approval or disapproval of the student's answers.
- 9. Human ASL signers must pause for few seconds before signing the answer options.
- If a human ASL signer is unsure how to sign and/ or pronounce an unfamiliar word, advise the student of the uncertainty and spell the word.
- 11. When using a sign that can represent more than one word, the human ASL signer may spell the word after signing it, if there is any doubt about which word is intended.

- 12. Human ASL signers must spell any words requested by the student.
- 13. When test items refer to a particular iPad or technology related movement, or directions of a passage, human ASL signers must note the lines or directions before signing the question and answer choices.
- 14. When signing selected response items, human ASL signers must be careful to give equal stress to each response option and to sign all of them before waiting for a response.
- 15. Human ASL signer must be familiar with the student's IEP or 504 plan and should know in advance which accommodations are required by the student.

GLOSSARY

Assessment: A systematic procedure/process for obtaining information from observation, interviews, portfolios, projects, tests, and other sources that can be used to make judgments about children's characteristics.

Multilingual learners: These are children whose primary or home language is other than, or in addition to, English and who cannot perform ordinary classroom activities in English, because they may have limited or no age-appropriate ability to understand or speak in English. Children who are multilingual learners have traditionally been called English language learners (ELLs). In the Early Childhood/ Early Learner field, the term dual language learner (DLL) is also used.

Guidelines: A description of suggested elements intended to accomplish a defined activity.

Performance: Describes behaviors exhibited while putting specific skills into action.

Reliability: The consistency of the results obtained from using an assessment tool (being free of error) is important for generalizing about children's learning and development. Reliability is represented by a figure between 0 and 1, such that values closer to 1.0 indicate better reliability.

Skill: This describes the ability of a child to use knowledge effectively and readily in performance (i.e., the ability to transform knowledge into action).

Student with a disability: This is a student with an Individualized Education Program (IEP) or a Section 504 plan.

Validity: This describes the extent to which a measure or assessment tool evaluates what it was designed to evaluate. This can be represented by a figure between 0 and 1, such that values closer to 1 which indicates better validity.
