In this scenario, everyone in the cohort is a student. The positive case will isolate. Because the case isn't wearing a mask, everyone closer than 6 feet will have to quarantine even if they're wearing a mask.

Close Contact - Quarantine

Student

In this scenario, the positive case is a teacher. Because an adult staff member is involved, students who are less than 6 feet away are close contacts and must quarantine. Those who are at least 6 feet away and masked are not close contacts and don't quarantine. Anyone more than 6 feet away will not quarantine regardless of mask use.
